

Successful password recovery is now possible without a GUI

April 2012. Passcovery Co. Ltd., a producer of high-speed password solutions, announces the simultaneous release of two updated products – Accent OFFICE Password Recovery 7 and Accent ZIP Password Recovery 4 – intended for recovery of Office/OpenOffice and Zip/WinZip passwords correspondingly.

Password recovery success is determined by a combination of two factors: search speed and flexibility of recovery settings. Both of these aspects have been considerably improved in Accent OFFICE Password Recovery 7 and Accent ZIP Password Recovery 4.

The updated versions of these programs got a new calculations module supporting GPU's with the AMD Graphics Core Next (GCN) architecture. This made it possible to use the programs on HD7970 and newer video cards. At the same time, the programs preserved their backward compatibility with older AMD video cards and full compatibility with NVIDIA GPU's.

In Accent OFFICE Password Recovery 7 and Accent ZIP Password Recovery 4, the user can define custom password recovery scenarios. By setting password generation rules, users can considerably reduce the number of checked values and save an enormous amount of time.

One of the special features of any program is the support of the command line interface. Accent OFFICE Password Recovery 7 and Accent ZIP Password Recovery 4 support this operation mode and provide GUI-less access to all of their features.

The increased functionality of the programs and extended compatibility with hardware will let users get their passwords recovered a lot faster.

Licenses and Pricing

Programs work on any computer running Microsoft Windows (Windows XP - Windows 7). The cost of a license depends on the number of graphics cards supported and starts at \$40 for a Basic license.

About Passcovery

Passcovery Co. Ltd. supplies high-speed, professional software solutions for recovering lost passwords. The first versions of these solutions were released in 1999. Today, the company's software is successfully used by law enforcement, government agencies, corporations and private individuals around the world.
