

Santa's Gone, but Savings are Here to Stay!

January 2010. The AccentSoft Team has announced month-long super savings on all its products and services through February 15. Get 30% off all password recovery solutions, decryption service for Microsoft Word and Excel files, and digital image batch processing software.

Not everybody's ready for the holiday season to be over. We at the AccentSoft Team want to keep that warm, fuzzy feeling going with a month of big savings on all our products and services.

Need some more holiday cheer? How about Accent Password Recovery, our popular suite of products for recovering passwords to Microsoft Office documents. We made sweeping changes to the algorithms for recovering Microsoft Excel and Microsoft Word passwords at the end of 2009, making Accent Password Recovery substantially faster as a result. Now you can get the new and improved suite for 30% off!

Want a top-up on the eggnog? Try our fast, secure decryption service for password-protected Microsoft Excel and Microsoft Word files. AccessBack can restore access to encrypted data in minutes, no matter how complex the password. Act now and get 30% off this handy new service.

Getting low on bubbly? How about 30% off on SnapTouch, our solution for batch processing of digital images. With smart image importation from your digital camera, date stamping and cropping with set proportions, SnapTouch is the ideal solution for a wide range of users. And if you buy it before February 15, you'll get an even sweeter deal.

Licenses and Prices

Our solutions are guaranteed to work on all modern Windows operating systems, including Windows 7. All of our solutions are distributed as shareware. Demo versions of our software are available online, and you pay nothing for our AccessBack decryption service until your files are fully decrypted.

Home and Corporate licenses are available for all our products, with prices starting at \$30. AccessBack prices depend on the number of files to be decrypted.

06 AccentSoft Team

The AccentSoft Team has been developing software for Windows since 1999. AccentSoft specializes in password recovery for popular file formats and digital photo processing. The Team's most popular products are Accent OFFICE Password Recovery and SnapTouch.
